Hi Kumo PRO

The remote maintenance solution for our entire residential and small public buildings range.

Why choose Hi Kumo PRO?

Based on the Hi Kumo app, Hi Kumo PRO goes even further. It enables you as the installation technician / maintenance company to suggest a seriously high value-added service to your customer: remote maintenance. Via a web platform, you are just a click away from access to operating data in the event of an error code or malfunction. An end to wasting time on traveling between multiple sites.

Functions
Fast diagnostics to optimize interventions thanks to a simple and user-friendly interface.

- Access to 3 months of system records, simultaneous display of 6 parameters from a total of more than 80.
- Access to real-time machine operating data*.
- Access to the entire system pool.
- Alarm data and troubleshooting help.
- Status, rebooting, and updating of the interface.
- Remote monitoring.
